slalom

Brand guide

FEBRUARY 2025

Visit brand.slalom.com

Hello!

We’re happy you’re here.

The Slalom brand is more than a logo. It’s the way we partner and approach our work. It’s our employee experience. It’s the impression we leave on others.

Consistent brand experiences clarify and strengthen who we are, what we do, and why we’re different—building deeper trust, awareness, and customer love.

Let’s get started.

Introduction

Why a brand guide?

The purpose of this document is to provide a detailed overview of the Slalom brand and how to use it, from understanding our foundational brand attributes to the dos and don’ts of iconography.

Who is this for?

If you write or design brand content for Slalom, this guide’s for you. If you’re new to Slalom and want to understand a bit more about our brand, this guide’s for you. If you simply want to learn more about how to represent the brand in presentations, emails, and events, then welcome!

Hi, collaborators

This document has also been approved for external distribution to educate partners, partner agencies, and vendors who work with Slalom on all the nuances of our brand.

01 Who we are

PURPOSE: OUR WHY

We help people and organizations dream bigger, move faster, and build better tomorrows for all.

- We are obsessed with serving you with excellence and focused on doing the right thing for our teams, partners, customers, and customers' customers.
- We help you reach farther and think bigger with the pragmatic expertise to make it happen.
- We fuel positive momentum and accelerate results that deliver sustainable success.
- We don't just consult, we partner with you to create, build, and implement solutions that work for you.
- We come with optimism and a belief that tomorrow is better than today. And that by working together, we will make it so.
- We believe that everyone—no matter your background, race, gender, age—can and should have access to a better tomorrow.

VISION: OUR JUST CAUSE

A world in which each person has the opportunity to love their life and work.

CORE VALUES

Our company culture sets us apart. These core values guide how we work with our customers, teams, and communities.

Do what is right, always.

Drive connection and teamwork.

Inspire passion and adventure.

Take ownership. Get it done.

Celebrate authenticity.

Focus on outcomes.

Fuel growth and innovation.

Stay humble and curious.

Build and shape a better future.

Smile.

fiercely human

At Slalom, we've always put people first.

Our fiercely human essence shows up in everything we do, whether we're collaborating with a customer, building a user-friendly dashboard, or reinventing an industry to better serve communities.

We know that no breakthrough or transformation ever happened because of technology or data alone. Essential human qualities like empathy, creativity, and curiosity are just as important—and they make the journey worth taking.

"Fiercely human" is not a tagline. You'll see it in some of our marketing content—usually as a descriptor, as in "fiercely human consulting" or "our fiercely human approach"—but it's much more than that.

It's the essence of our brand.

Check out our Creative Lens on page 17 to learn more about how our fiercely human essence comes to life in our brand voice and visuals.

IMPORTANT

- Don't separate "fiercely" from "human."
- Don't call things "fierce."
- Don't imply that we're making people "more human" (e.g., *Slalom can make your team more fiercely human*). This is about our *approach* to everything we do.

WHO WE ARE

Slalom is a fiercely human business and technology consulting company that teams with leaders who expect more. So we bring more.

WHAT WE DO

Every day, we work at the forefront of industry, combining our deep roots in technology and data, to help you tackle challenges, improve operations, and drive sustainable growth. From strategy through delivery, we collaborate with you to bring powerful customer experiences, innovative ways of working, and new products, services, and businesses to life.

WHAT WE BRING

More leading with why and how. More connections and breakthroughs. More quickstart solutions. More care for you and your team. More value. In all ways. Always.

SLALOM SERVICES

Slalom's services are broad, deep, and infinitely customizable.

With a relentless focus on "why," we combine our services to discover, design, and build the most impactful solutions for you.

DIFFERENTIATORS

Why Slalom?

CUSTOMER LOVE

We take love seriously

Our focus on our customers, and their customers, is unwavering. We measure customer love in 10 dimensions and use those metrics to guide our business.

GLOBAL/LOCAL

Local soul, global scale

We're fully invested in the long-term success of our local customers and communities, while also offering the connected strength of a global organization.

OUR APPROACH

Momentum that outlasts us

We learn what you need, tailor solutions to you, and work with you to drive results. Along the way, we empower your teams to keep momentum going after we leave.

PEOPLE-CENTERED

Head and heart in everything we do

We show up authentically and get to know you, leading with empathy and kindness. Projects succeed or fail because of people, and we get the people part right.

PARTNERSHIPS

Deep connections, better outcomes

Our trusted partner relationships are based on thorough understanding of each one's technology—driving exponential impact for our joint customers.

Learn more about Slalom differentiators and how to customize them for your market or team. We've also included additional differentiators you can use if they're helpful, such as "Privately held," "Agility your way," "Do with, not for," and "No silos, ever."

ELEVATOR PITCH

Help spread the word

Use these scripts as a starting place for introducing Slalom. Feel free to spotlight specific services *(page 11)* or differentiators *(page 13)*, depending on who you're talking to.

*Get the latest team and office numbers on SlalomOne.

Start with:

"I'm a [role] at Slalom. We're a next-generational professional services company that creates value at the intersection of business, technology, and humanity."

Have more time? Add:

"We have a fiercely human approach. We work to deeply understand our customers—and their customers—and together develop practical, end-to-end solutions. We partner with some of the world's biggest technology companies—like Amazon, Microsoft, and Salesforce—to deliver breakthrough impact for our customers."

Even more time? Add:

"We have an amazing culture that's rooted in our purpose and core values. People love working at Slalom because they can be their authentic selves and do really meaningful work. Today, we have 12,000 team members in eight countries and 49 offices.*"

Bonus:

"We've been recognized as a best place to work in many of our communities, and we've been one of Fortune's 100 Best Companies to Work For eight years running."

Add a story!

Even if your pitch is very short, you can bring it to life with an example. Keep it concise and focused on impact. Here are some models to follow, but it's best to tell a customer story you really know and care about.

"For example, we developed Vivi, one of the first generative AI-powered digital humans built on Salesforce, to help Virgin Voyages redefine customer satisfaction in the cruise industry."

"For example, we helped the Chicago Cubs deeply understand their fan base and identify new engagement opportunities to draw the next generation of fans to Wrigley Field."

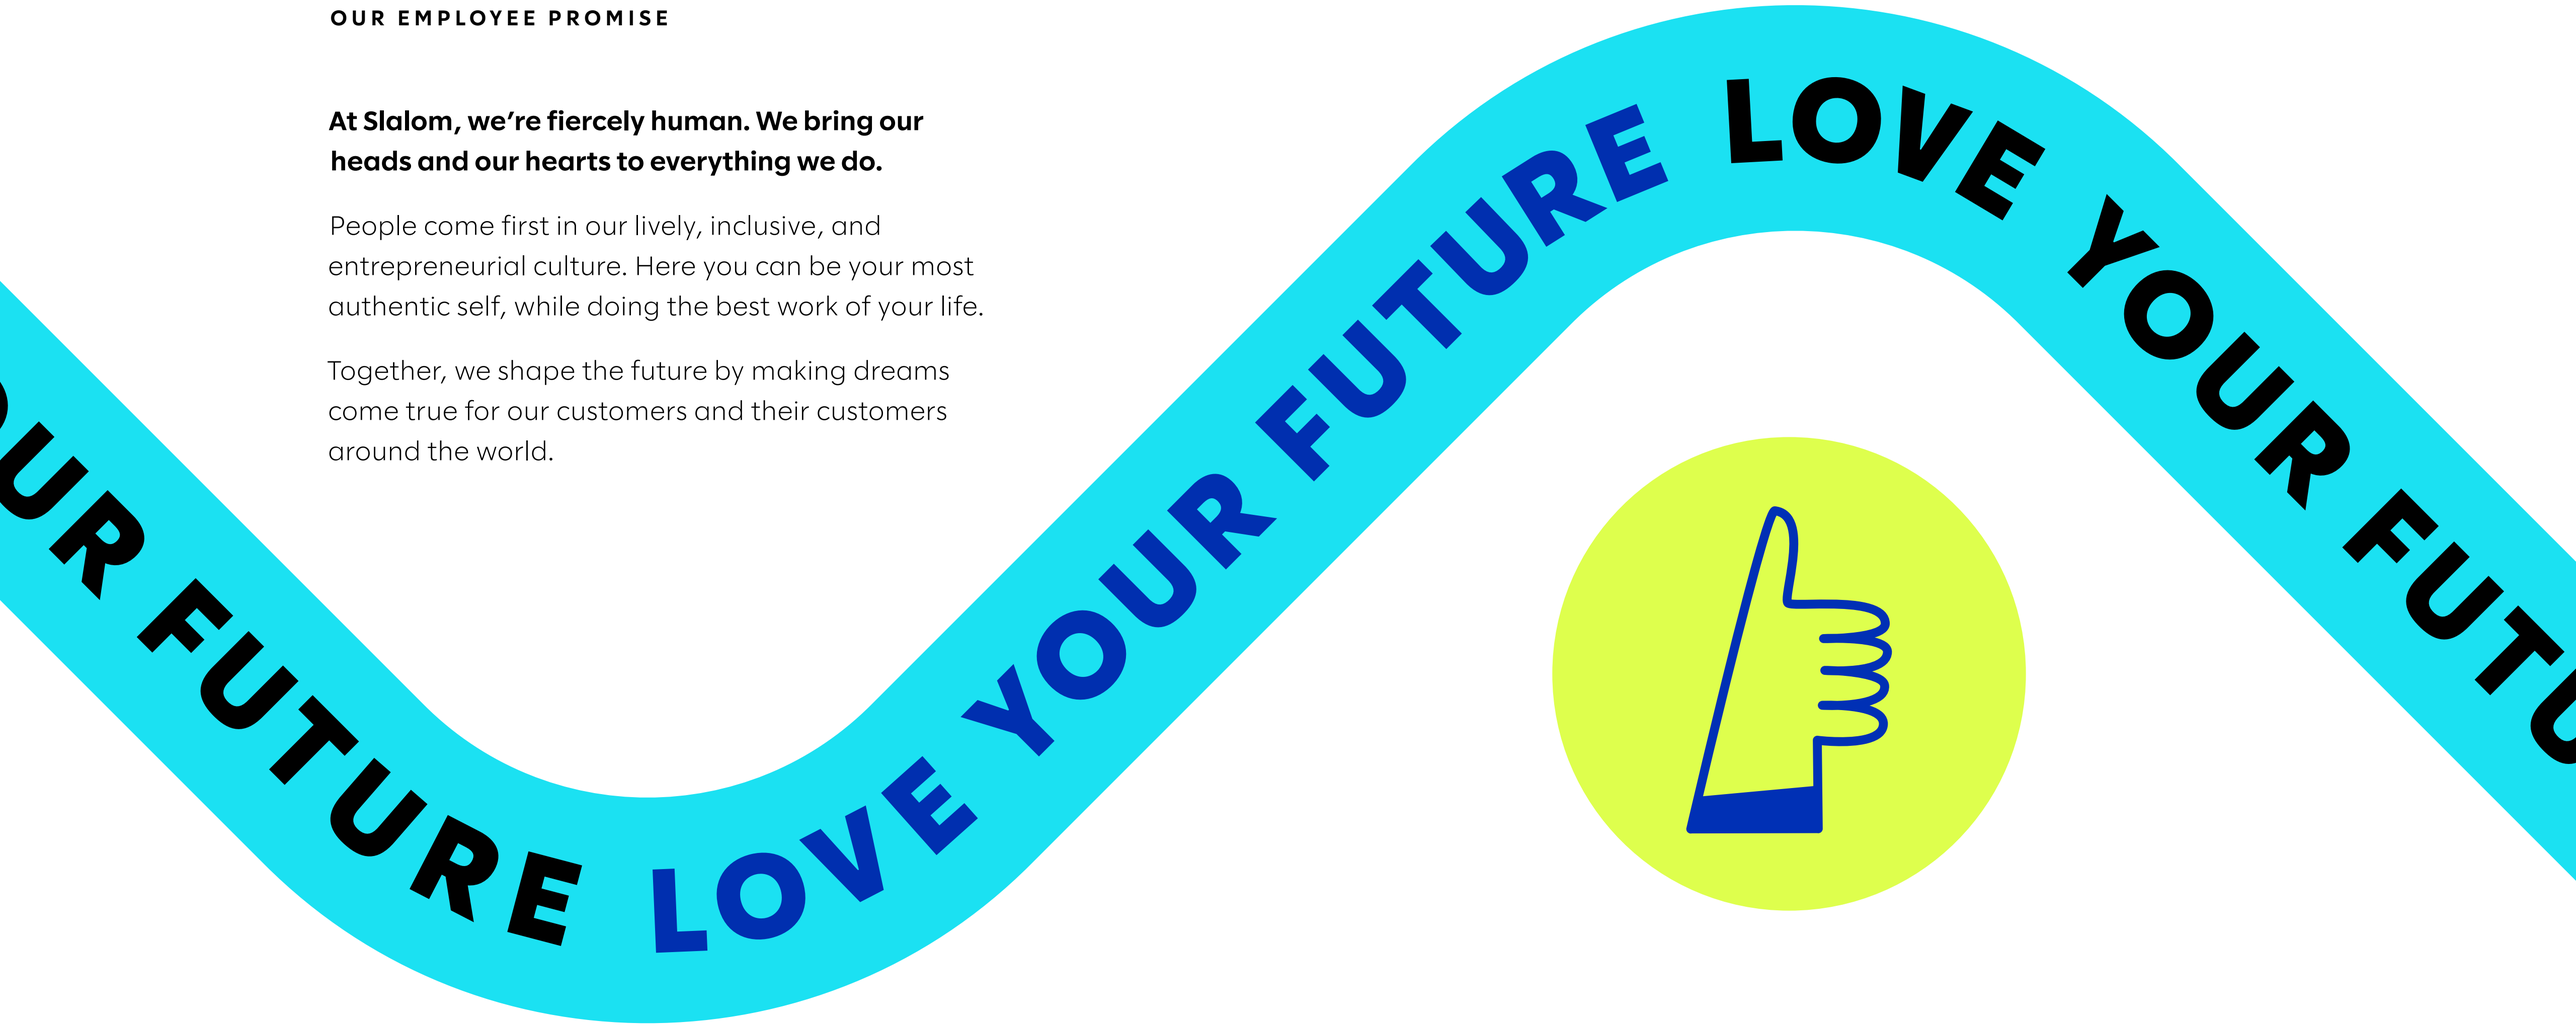

"For example, we helped stock exchange giant Nasdaq build an enterprise-level culture activation roadmap to strengthen the connection between its growth strategy and its people strategy."

OUR EMPLOYEE PROMISE

At Slalom, we're fiercely human. We bring our heads and our hearts to everything we do.

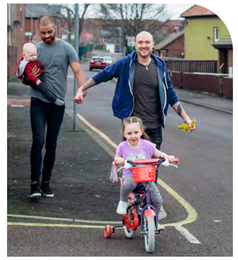

People come first in our lively, inclusive, and entrepreneurial culture. Here you can be your most authentic self, while doing the best work of your life.

Together, we shape the future by making dreams come true for our customers and their customers around the world.

OUR ANTHEM

Better tomorrows, together

At Slalom, we thrive at the intersection of business, technology, and humanity.

We roll up our sleeves and work side by side with you,

Focusing relentlessly on your “why,”

Delivering breakthrough solutions with lasting impact,

And bringing joy along the journey with our fiercely human approach.

Let’s discover, design, and build

Better tomorrows, together.

02 Our Creative Lens

OUR CREATIVE LENS

Is it fiercely human?

Are you a writer or visual artist?
Use this guide to help you express the Slalom brand essence.

	Voice	Visuals	NOT
People-first	Approach technology stories as human stories. Lead with people and show the impact of what we do. Inclusive and globally sensitive.	Photos and illustrations that showcase the human benefit and positive impact of technology. Personal connection at global scale.	X technology-first X corporate X sentimental
Uplifting	Inspire others to build better tomorrows. Show up as passionate experts who share knowledge generously without pressure or fearmongering.	Bright, colorful, and optimistic photos and illustrations. Helpful and easy-to-understand information design.	X academic X authoritative X utopian
Friendly	Warm and conversational, with genuine desire to help. Curious and engaging. Don't sell—invite a relationship.	Images of globally relevant moments of empathy, connection, and collaboration. Playful custom illustration and color.	X neutral X formal X sales-y X ingratiating
Real	Direct and clear. Simple language. Minimal industry jargon. Honesty through humor that's humble, never mean. Show the human truths of our life and work.	Diverse but relatable people and scenes. Highlight authentic, candid moments. Genuine emotion.	X perfect X slick X posed X homogenous
Innovative	Creative and unexpected. Not the consultant you were expecting. Action-oriented. Snappy headlines and concise summaries.	Dynamic compositions symbolize transformation. "Slalom lines" evoke flexibility and nimble movement. Rich media. Bite-sized and scannable text blocks.	X expected X conventional X chaotic X wacky

03 Voice

WRITING FOR SLALOM

The Slalom brand voice is clear, confident, and conversational.

Principles

In a high-stakes environment of rapid change, Slalom is helpful and optimistic.

We connect with businesspeople as people, offering clarity, empathy, and inspiration.

We are

People-first, not technology-first

Uplifting, not authoritative

Friendly, not formal

Real, not slick

Innovative, not expected

WRITING FOR SLALOM

Tips for writing in the brand voice

Follow these tips to bring stories, solutions, opportunities, and results to life with simple, compelling language—and make data and technical information easy to understand.

Appeal to your reader's emotions and needs

Put yourself in their shoes. What matters? What do they want to know? What are their concerns? What would make a difference?

Address your reader directly

Make it easy for people to relate to your content personally (e.g., use second person, as in "you can" instead of "the client can").

The customer is always the hero

Frame the benefits from a customer perspective, not a Slalom perspective.

Be conversational

Your copy should be relaxed and casual. Write about the topic as if you're explaining it to a friend.

Write crisply and concisely

Cut to the chase. Your main objective is to get the message across to an audience, not wow them with big words. If a simple sentence works, use it.

Be clear

Don't assume that the audience will draw conclusions from your info or read between the lines. Say what you need to say.

Avoid jargon

If your friend wouldn't understand it, try not to say it that way. If you do need to use a term the average person might not understand, define it on first use.

Use active voice where possible

Passive voice isn't a no-no, but be sure to use it wisely and well.

Use metrics to back up your arguments

And cite your sources.

Be consistent

There are lots of gray areas in grammar and style. To create a polished, professional feel, it's important that we're consistent.

Slalomers

In colloquial, informal settings, this is the preferred term for members of the Slalom community. Not "Slalomites." For formal and external communications, use "Slalom team members."

Customers

We generally prefer "customers" instead of "clients," as in "our customers' customers."

BEST PRACTICES

Style basics

We mostly follow *The Chicago Manual of Style* (*CMoS*), breaking or bending its rules in a few instances to better serve the Slalom voice and our readers. We also follow *Merriam-Webster* (*M-W*).

Here are our top tips. Learn more and explore our glossary of common terms in the Slalom writing style guide.

Abbreviations and acronyms

Use the full name on first reference followed by the abbreviation or acronym in parentheses if it's used again later. Examples: American Cancer Society (ACS), minimum viable product (MVP), organization (org)

No need to use periods in between letters for most acronyms. Follow *CMoS* for best practices. Examples: CEO, US, UK

Even when acronyms are capitalized, the term is often spelled out lowercase (e.g., AI is artificial intelligence). Do a quick online search to confirm general usage.

Capitalization

Our goal is to maintain a conversational, friendly tone.

Headlines and subheads

This is a subtle case where design and editorial meet to create an impression. In all Slalom materials—website, PowerPoint decks, and SharePoint pages alike—sentence case headlines and subheads are preferred. Use title case in very select circumstances, like Medium blogs and wired press releases.

Offering and solution names

We capitalize unique product, service, or event names that qualify as proper nouns (e.g., Moonshot, Build Centers, Salesforce Community Cloud) but not straightforward, self-explanatory descriptors (e.g., our experience design practice, customer data platform).

Job titles

In body copy, minimize capitalization of titles to maintain a conversational tone and comply with *CMoS* (e.g., senior consultant, managing director). However, in pull quotes, social assets, or any formal settings, standard capitalization applies (e.g., Solution Principal, General Manager).

Industries

Not capitalized in general usage and body copy (e.g., healthcare, financial services). Okay to capitalize in industry lists or when needed for clarity or impact.

Em dash (—)

The em dash is used in much the way a colon or a set of parentheses is used; it can show an abrupt change in thought or be used where a full stop (or period) is too strong and a comma too weak.

Em dashes should be closed (no spaces around).

- **Do:** Three writers—Ruth, Randi, and David—managed to agree on this rule.
- **Don't:** Other style guides - like AP - recommend en dashes with spaces. Slalom follows *CMoS*.

Continues on next page

Continued from previous page

Inclusive language

Avoid using biased language. Be sensitive to idioms, phrases, and terminology that either hold a problematic history or may make others uncomfortable.

The Slalom writing style guide includes some recommended resources to help you use inclusive language, as well as additional guidance on language around personal identity.

Numbers

Typically spell out zero to nine and use digits for 10 or more (per AP style, or *CMoS* alternative rule 9.3). Note: This rule is flexible in headlines and on social media where grabbing attention is paramount. It's also okay to stray from this rule when highlighting large financial metrics (e.g., $7K, or a $1B company).

Percent (%)

We consciously break the *CMoS* rule. Use numerals and "%" in most cases, except when starting a sentence.

- **Do:** The team reported a 44% increase in overall happiness after adopting Agile.
- **Do**: Ninety percent of cats are silently correcting your grammar.

Pronouns

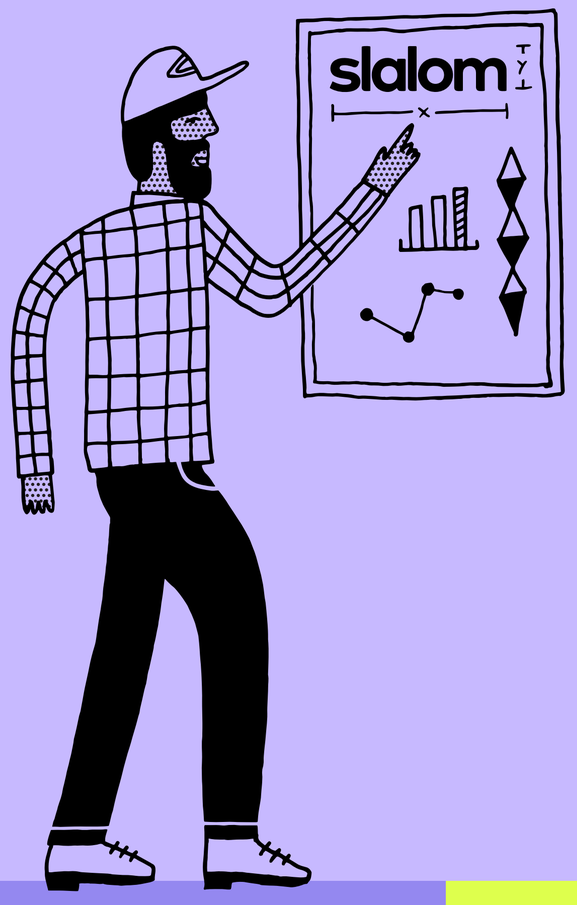

Do not automatically use he/him/his pronouns if you want to make a universal statement. The singular "they" is now widely accepted and many other writing techniques for gender neutrality are available. When writing about an individual, always respect and use their pronouns.

Spaces

There should be one space—not two—between sentences and after colons.

04 Logo

LOGO

The geometry and design of the Slalom logo

We designed our logo to be approachable and human. Lowercase letters, shortened “l’s,” and rounded corners make our wordmark feel more friendly. Our logo is original, professional, and humble.

This section offers guidelines to ensure that our logo is always legible and consistently applied.

LOGO

Approved logo color combos

IMPORTANT

- The Slalom logo can **only** be used in Slalom Blue, Slalom Dark Blue, White, or Black.
- Don't recolor the logo to any other color, including secondary brand colors.

YES

- When possible, use the Slalom Blue logo, *unless it breaks the color rules on page 44*.
- White or Black may be used. White is preferred.

NO

- Do not colorize the Slalom logo.
- The logo may not be shown in any color other than Slalom Blue, Slalom Dark Blue, White, or Black.

Primary lockup

The preferred use for the Slalom logo is this one-color version—that is Slalom Blue or Slalom Dark Blue on a White background.

Primary alternate lockups

When the primary lockup is not possible, Slalom Blue, Light Gray, and Slalom Dark Blue backgrounds are the preferred alternatives (listed in order of preference).

Black / White lockup

Reserved for black-and-white layouts only.

Secondary lockups

The logo should always be Slalom Blue or Slalom Dark Blue on secondary color backgrounds, except in the case of Coral Red or darker tones, when it may be reversed out.

LOGO

Logo size and spacing

0.125 inches / 9 pixels high

Minimum size requirement
The logo should be displayed no smaller than 0.125 inches (9 pixels) in height. This ensures legibility when printed or displayed digitally.

Clear space requirement
There should always be generous amounts of clear space around the logo, at least the width of an “o.”

LOGO

Improper logo treatment

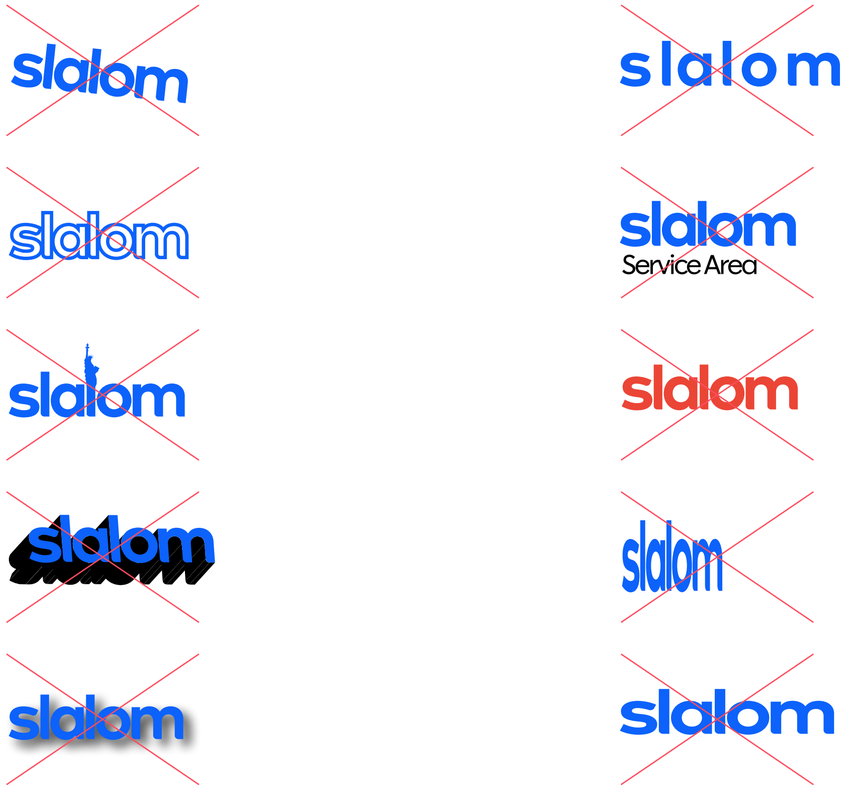

The logo was created using a fine-tuned system of typography, scale, and color. Part of using the logo properly is helping to keep the integrity of the design.

YES

- The Slalom logo should ONLY appear in Slalom Blue, Slalom Dark Blue, White, or Black—NOT secondary brand colors.

NO

- Do not apply effects to the logo.
- Do not rotate the logo.
- Do not skew the logo or make it three-dimensional.
- Do not change the color of the logo.
- Do not make the logo into a pattern or texture.
- Do not alter the logo with any other elements, including logos, words, graphics, photos, slogans, or symbols, to create a hybrid mark.

Placing the logo on photos

YES
- The logo may appear on colored, illustrated, or photographic backgrounds, as long as the legibility and integrity of the logo are not diminished.

NO
- Do not place the logo on a high contrast visual or complex images and patterns.

YES

YES

YES

YES

Align to corner if photo is complex.

YES

YES

Choose or edit photos to match a brand color.
Center align or align to a corner on single-brand color photos with simple backgrounds for logo and text legibility.

NO

Logo blocks subjects' faces.

NO

For legibility, avoid too high-contrast.
Avoid multicolor backgrounds.
Avoid nonbrand colors.

What is a Slalom sub-brand?

One logo.

One global brand.

A single Slalom logo ensures brand consistency, recognition, and trust. There are no other secondary logos. However, the Slalom logo may be locked-up with the name of a market, product, service, technology, program, etc. Remember, having too many sub-brands dilutes the Slalom brand. Before creating a sub-brand, ask yourself three questions *(see right.)*

YES

- **Follow the sub-brand guidelines** (e.g., the Slalom logo paired with sub-brand name in Slalom Sans Light).
  See "How to create a sub-brand logo lockup" on page 31.

NO

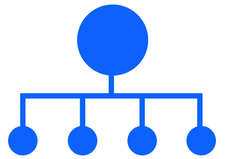

- **Do not create new logos** for any product, service, technology, program, etc. There are no exceptions.

IMPORTANT

Before creating a sub-brand, ask yourself...

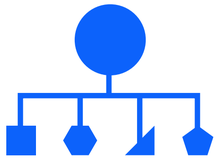

Does it uplevel the Slalom brand?

Apply a brand filter whenever we design new materials; does this help build or dilute Slalom's brand equity?

Could it increase brand confusion?

By minimizing the number of identities a partner, customer, or employee interacts with, we build trust and loyalty.

Is the sub-brand name clear and succinct?

Within naming conventions, prioritize clear, simple, and descriptive names rather than abstract.

slalom human resources

slalom london

slalom converge

How to create a sub-brand logo lockup

WAIT!
Have you read page 30? Go there first.

Horizontal lockup

- Start with the Slalom logo.
- Using half the Slalom “m” start the descriptor text as shown in cyan.
- Use Slalom Sans Sans Light at the same x-height as the stem of the “a” in the Slalom logo.
- Use Slalom Sans Light and set the tracking to -10 points for the descriptor text.

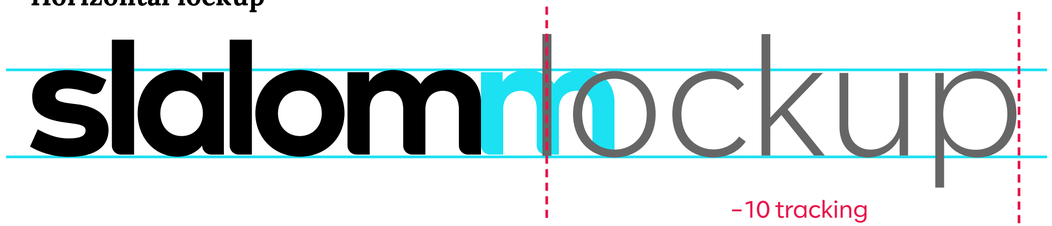

Stacked lockup

- Start with the Slalom logo.
- Using the height of the “l,” place the top edge of the descriptor text at the vertical half point of the “l.”
- Align the start point of the descriptor text to the top point of the “s” in the lower curve.
- Use Slalom Sans Light and set the tracking to -10 points for the descriptor text.

Partner lockup

- Start with the Slalom logo.
- Using the full width of the Slalom “m,” start the partner logo as shown in cyan.
- Divider line is 125% the height and 10% the width of the Slalom “l” as shown in diagram.
- Partner logo should not exceed height of divider line and should be centered vertically.

Horizontal lockup

Vertical lockup

Partner lockup

Divider line

Height = 125% of “l”
Width = 10% of “l”

SUB-BRANDING

Employee Resource Groups (ERGs)

We designed a unique sub-branding system for our ERGs. Each group has logo, signature color, unique pattern, icon, backgrounds and more. Refer to the ERG Style Guide for more detailed design guidance and assets.

05 Color

COLOR

Our brand color palette

IMPORTANT

- A Slalom blue MUST be present in EVERY composition.
- Download our Adobe Color Swatch Palettes.
- Do not use the Eyedropper tool to grab colors as its accuracy is not reliable.

Tones and tints

Each color in our secondary palette has a supporting set of three dark tones* and three light tints.**

IMPORTANT

1. A Slalom Blue MUST be present in EVERY composition.
2. Download our custom Adobe Color Swatch Palettes.
3. Do not use the Eyedropper tool to grab colors as its accuracy is not reliable.

YES

- Primary and secondary colors should always lead.
- Use "tone-on-tone" coloring to add depth to designs.

NO

- **Tints and tones should rarely be used as full floods of color**, nor should they be used often as a dominant color in a layout.

DARK TONES			SECONDARY COLOR	TINTS		
Cyan - Dark 3 **RGB** 0/186/214 **CMYK** 100/0/13/22 **HEX** 00BAD6 **PMS** 3135C	**Cyan - Dark 2** **RGB** 5/196/222 **CMYK** 100/0/11/6 **HEX** 05C4DE **PMS** 2229C	**Cyan - Dark 1** **RGB** 14/211/235 **CMYK** 89/0/19/0 **HEX** 0ED3EB **PMS** 3125C	**Cyan** **RGB** 27/225/242 **CMYK** 60/0/10/0 **HEX** 1BE1F2 **PMS** 3115C	**Cyan - Light 1 (70%)** **RGB** 95/234/246 **CMYK** 42/0/7/0 **HEX** 5FEAF6	**Cyan - Light 2 (50%)** **RGB** 141/240/249 **CMYK** 30/0/5/0 **HEX** 8DF0F9	**Cyan - Light 3 (20%)** **RGB** 209/249/252 **CMYK** 12/0/2/0 **HEX** D1F9FC

*Dark tones are custom builds versus adding black to achieve darker tones.
**Light tints are a percentage of the full secondary color.

COLOR

Approved color combos

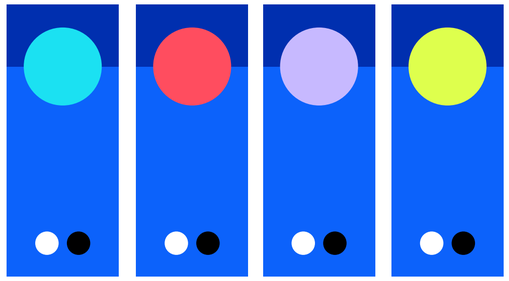

IMPORTANT
To maintain brand integrity, please only use these color hierarchies and combinations.

YES

- **Slalom Blue and Slalom Dark Blue are our PRIMARY colors and should be used most often.**
- To avoid our designs looking too "rainbowy," pair blue with only ONE secondary color per composition.
- Only use the combos shown here.
- **A Slalom Blue (regular or dark) must be present** in every composition.
- **Text has its own color combo guidelines** to meet accessibility standards. *See "Approved text color combos" on page 44.*

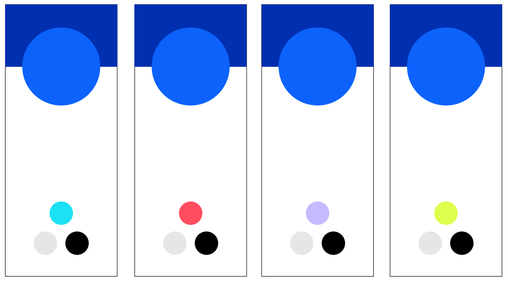

NO

- **Do not use all the colors at once,** unless approved by Global Marketing, OR you are using an official color bar. *See "Color bars" on page 59.*

COLOR

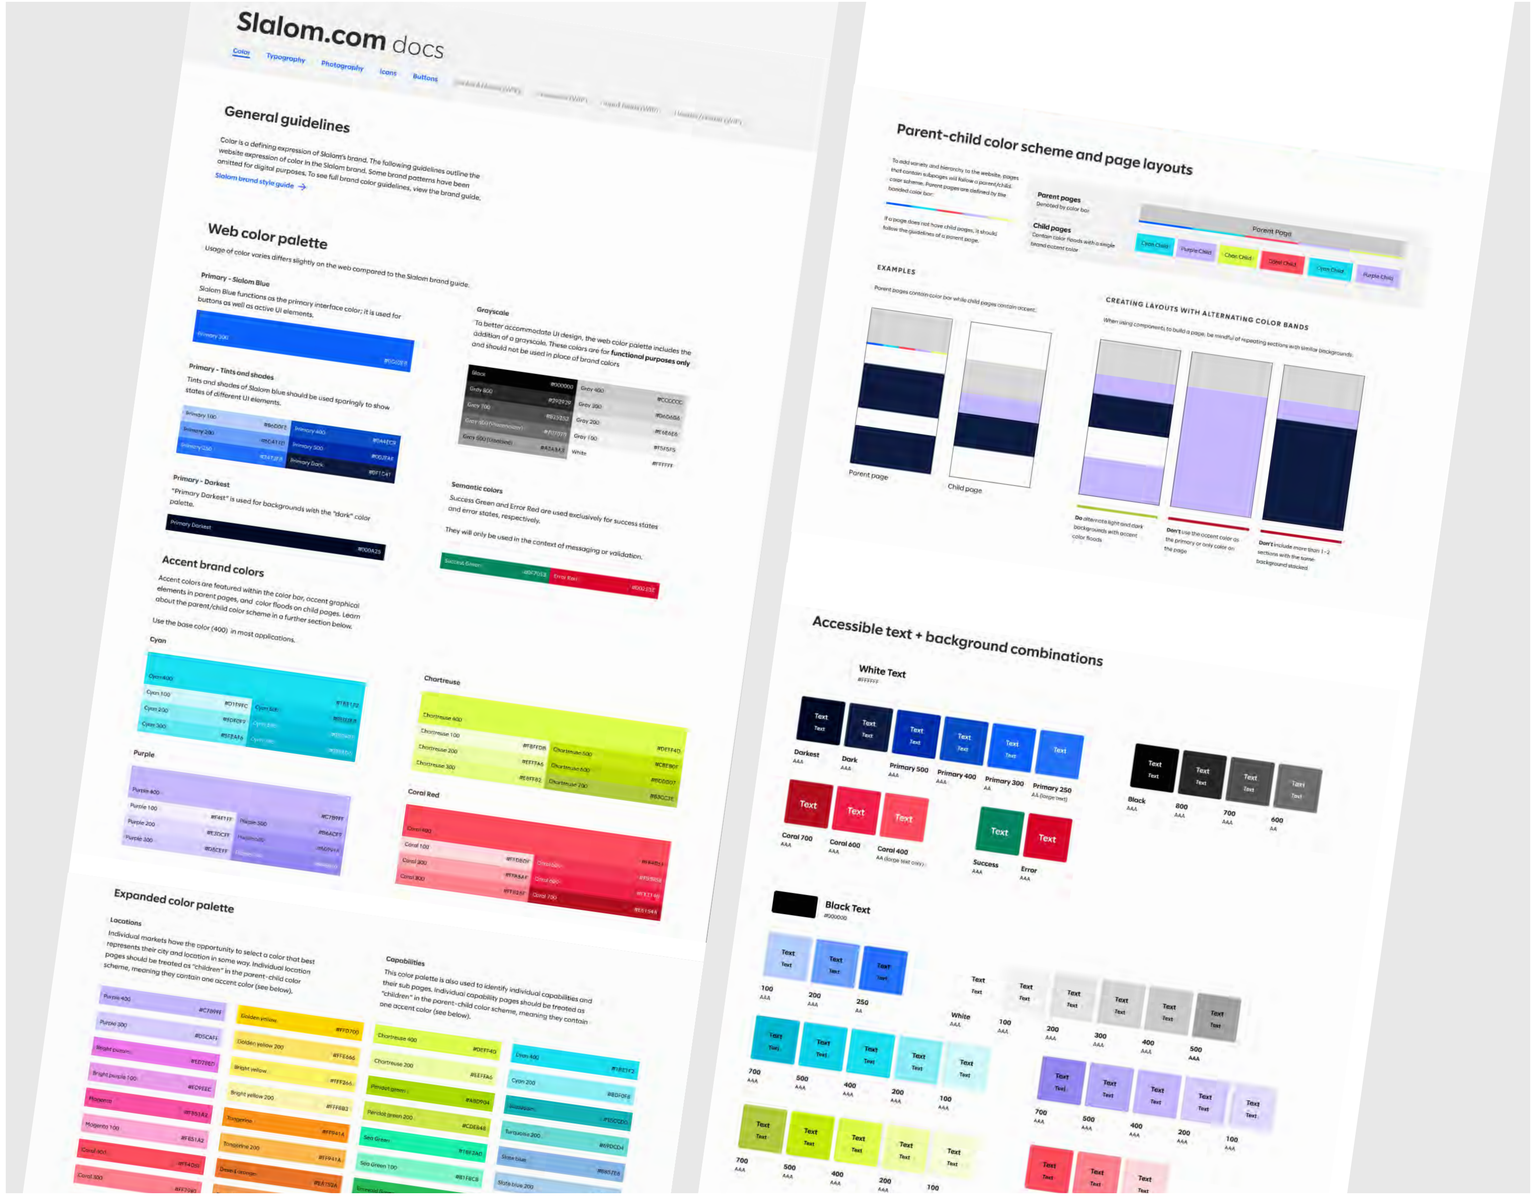

Slalom.com website color palette

Due to accessibility and user-interface needs, there is an extended color palette for the Slalom website.

Refer to the Figma style guide for color codes and guidelines.

IMPORTANT

- These additional colors should only be used on the Slalom.com website, not on any other digital or print collateral.

COLOR

Our approach to accessibility

Designing with accessibility in mind is critical for inclusivity. It maximizes the likelihood that everyone (regardless of ability, context, or situation) can use or view a product or design.

While nothing can be 100% accessible to all people, the goal is to make designs accessible to the highest degree possible. Consequently, we conform to Web Content Accessibility Guidelines (WCAG) and adhere to 2.1 AA standards.

Additional resources:

- LinkedIn Learning courses
- Five recorded internal accessibility training videos
- Color contrast checker
- Join the Accessibility Teams channel

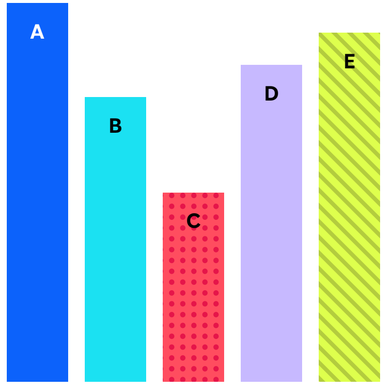

How to design for accessibility

YES

- All text, charts, and data graphs **must strictly conform to WCAG 2.1 AA standards.**

NO

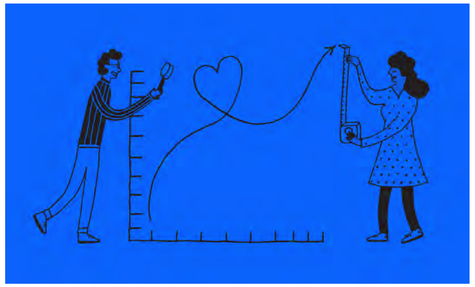

- Graphics (such as illustrations, photos, Slalom lines) do NOT need to be adjusted for contrast. However, when possible, use “ALT image tags” or captions.
- **Do not rely on color to convey meaning.** Use a combination of color, shapes, and text to aid viewers with color blindness.

Visualizing data

All text has a high-contrast ratio and passes WCAG 2.1 AA standards.

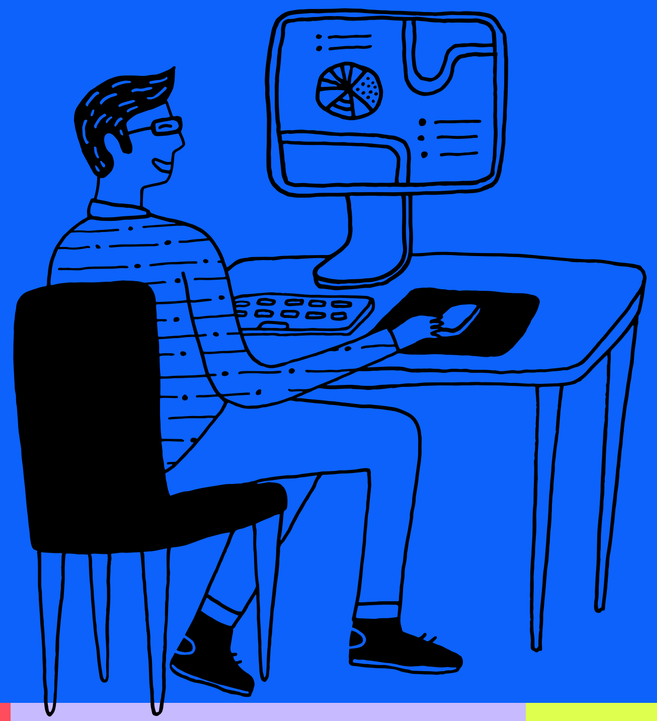

- Don’t rely on color to convey meaning. Use a combination of color, pattern, shapes, and text.
- Remember, Coral Red and Chartreuse (yellowish green) are challenging for color blindness.
- Ensure data is labeled and apply fill textures and/or patterns with contrast (4.5:1) between the text and the background (with two-tone pattern) and enough contrast (3:1) between the chart elements.
- Consider adding a 1 px top border (for a bar chart) or outline (for other chart types) to ensure higher readability.

Graphics & illustrations

Illustrations, icons, and photos do not need to adhere to the same high-contrast standard as text.

06 Typography

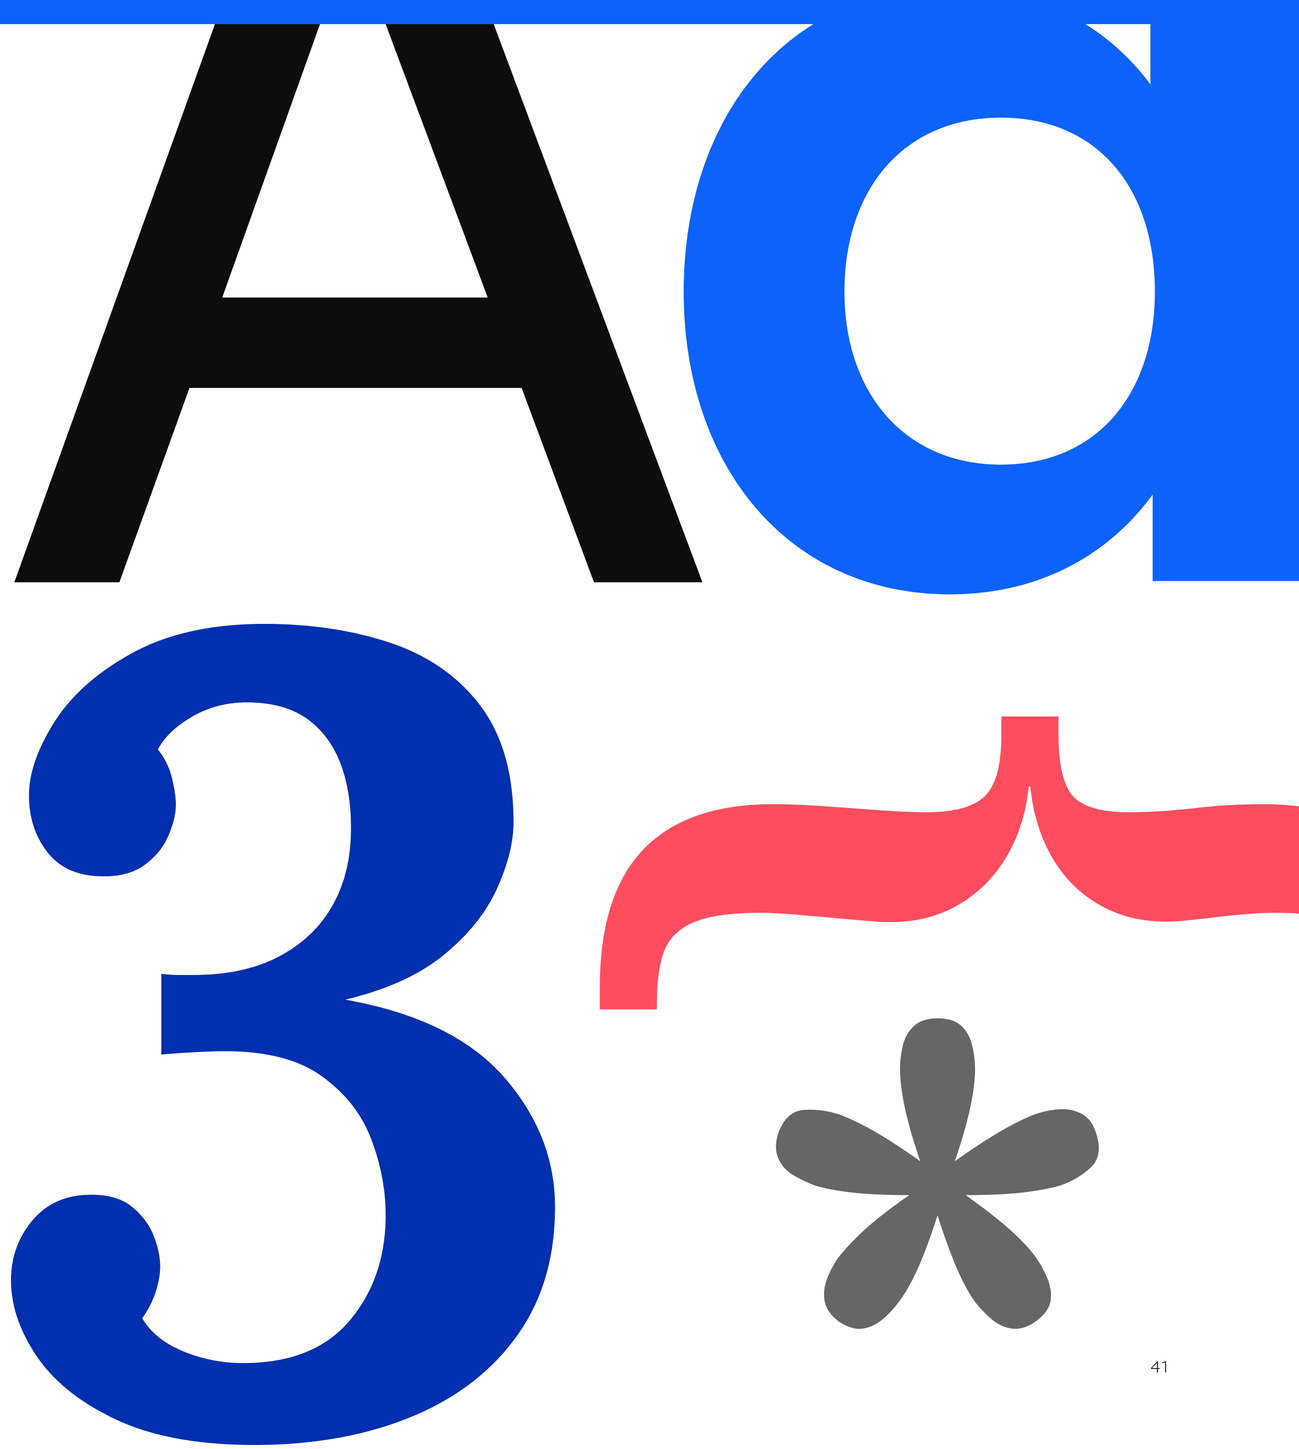

TYPOGRAPHY

Establishing tone with type

Typography is one of the main pillars of the brand. It gives our words personality and, when used consistently, helps build brand recognition.

Typography, paired with consistent hierarchy, will increase comprehension and reduce cognitive load on our readers.

TYPOGRAPHY

Brand fonts

We have two fonts.
Both may be used in a single layout.

1. **Slalom Sans is our primary font** and may be used on any layouts, EXCEPT PowerPoint slides. *See page 43 for PowerPoint slide fonts.*

2. **Lora** is our supporting font. Its use is optional. When in doubt, use Slalom Sans.

IMPORTANT
Neither Slalom Sans nor Lora should be used in PowerPoint slide decks as these fonts are not compatible with some of our customers' systems.

Slalom Sans Thin
Slalom Sans Thin Italic
Slalom Sans Light
Slalom Sans Light Italic
Slalom Sans Regular
Slalom Sans Italic
Slalom Sans Bold
Slalom Sans Bold Italic
Slalom Sans Black
Slalom Sans Black Italic

Our primary brand font, Slalom Sans

Slalom Sans is a clean, professional, and friendly font designed specifically for Slalom and should be used in ALL branded materials, EXCEPT PowerPoint slide decks.

Lora Regular
Lora Italic
Lora Medium
Lora Medium Italic
Lora Semibold
Lora Semibold Italic
Lora Bold
Lora Bold Italic

Our supporting brand font, Lora

A serif font, Lora, is our secondary typeface to complement Slalom Sans. It adds variety and a humanistic touch. Its use is optional.

TYPOGRAPHY

PowerPoint-ONLY font*

The Slalom PowerPoint Slide Template is the ONLY place (see exceptions below) we use Avenir Next LT Pro. Avenir is NOT the same as Avenir Next LT Pro.

Avenir Next LT Pro was selected for its compatibility with our customers' and partners' computer systems and should ONLY be used in PowerPoint slide decks.

***IMPORTANT**
Do not use this Avenir Next LT Pro in ANY brand materials EXCEPT PowerPoint slide decks or **these three use cases**:

1. **MS Outlook** email default settings (external emails)
2. **MS Power BI Dashboards**
3. **MS Word Docs** that are editable and shared with clients

Avenir Next LT Pro Light
Avenir Next LT Pro Light Italic
Avenir Next LT Pro Regular
Avenir Next LT Pro Italic
Avenir Next LT Pro Demi
Avenir Next LT Pro Demi Italic
Avenir Next LT Pro Bold
Avenir Next LT Pro Bold Italic

Our slide deck font, Avenir Next LT Pro

Avenir Next LT Pro is a free Microsoft cloud font that is only used in our PowerPoint template (see exceptions on the left in red). It is used nowhere else. **Avenir is NOT the same as Avenir Next LT Pro.**

YES

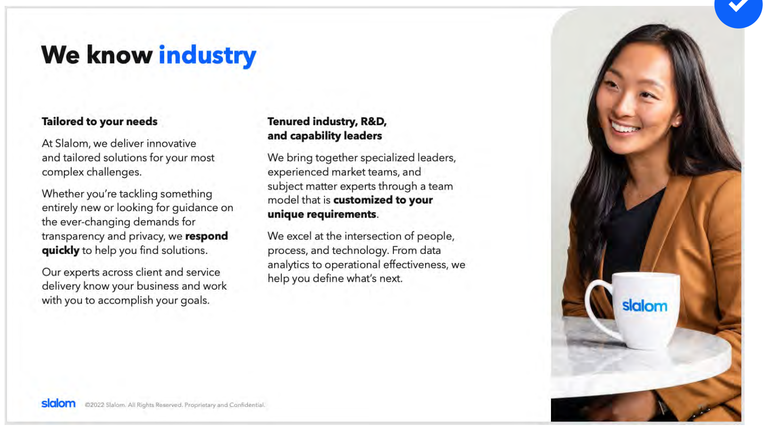

Figure 1: PowerPoint slides

NO

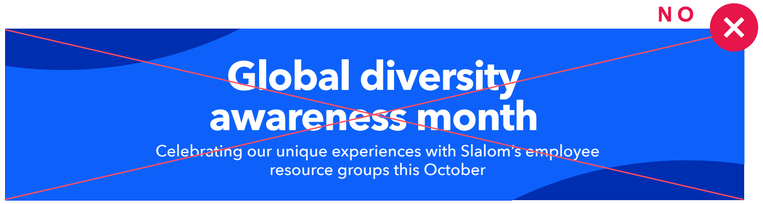

Figure 2: This **digital banner ad example** INCORRECTLY uses Avenir Next LT Pro font when it should be using Slalom Sans or Lora fonts.

REMEMBER: All non-PowerPoint designs should use Slalom Sans or Lora. Even though Avenir Next LT Pro looks similar, it is important that we stick to our unique brand fonts for consistency. NEVER use Avenir Next LT Pro for any other format, such as social media, print, video, digital, etc.

COLOR

Approved text color combos

In order to maintain brand integrity and accessibility, use ONLY these approved color combinations.

IMPORTANT
To avoid a "rainbowy" effect, **pair only ONE secondary color with Slalom Blue, Slalom Dark Blue, White, and/or Black at a time,** unless approved by Global Marketing.

QUOTE AND CAPTION STYLES

Quote 1: Lora Regular

Quote 1

“Piem tus, hala sul videsensuam pectortem aterum intem iptiquerio tanula ca; hilis, nirmaioc opublin vivesse nteniu.”

Caption 1

Slalom Sans Bold
Slalom Sans Regular

Quote 2: Slalom Sans Regular

Quote 2

“Piem tus, hala sul videsensuam pectortem aterum intem iptiquerio tanula ca; hilis, nirmaioc opublin vivesse nteniu.”

Caption 2

Lora Bold
Lora Regular

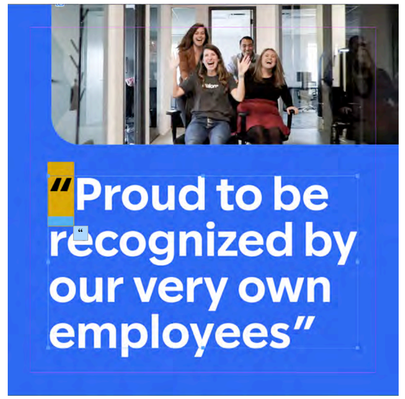

“There are three types of quotation marks: “smart quotes curly,” (left) “smart quotes slanted,” (middle) and “straight quotes” (right). In image text, use the smart quotes curly.”

QUOTATION MARKS

There are three types of quotation marks: “smart quotes curly,” (left) “smart quotes slanted,” (middle) and “straight quotes” (right). In image text, use the smart quotes curly.

“ ” VS ″ ″ OR ❛❛ ❜❜

How to create smart quotes

Adobe CC applications instructions
1. Highlight quotation mark mark (or apostrophe) with type curser.
2. Hover over the highlighted blue band. at the bottom of the glyph selection.
3. Once “smart quote” style appears from dropdown of glyph alternates, select by single-clicking to replace.

Layout reference only.

Size and weight

- Limit type to no more than three sizes.
- Use Slalom Sans Bold or Lora Regular for large headlines.
- Use Slalom Sans Regular for increased legibility at small sizes or over backgrounds.
- Use Slalom Sans Bold or Lora Bold for subheads.

Case

- Sentence case is our standard for all communications.
- Use all-uppercase sparingly—for Slalom line typography, short headings, or subheadings (“eyebrows”), and never for full paragraphs.
- Avoid using all-lowercase type, unless specified.

Line spacing

- Line spacing refers to the space between lines of type. *See the chart at right for line-spacing guidelines.*

Letter spacing

- Letter spacing (also known as tracking) is the space between letters.
- Slalom Sans is designed so that letter spacing and word spacing are set by default to 0. In some cases, spacing may need to be adjusted.
- Make sure that letters never touch one another.
- See the chart at right for tracking guidelines.

Justification

- Type should always be set flush left, ragged right.
- Slalom Sans should never be justified or centered.
- Avoid widows, orphans, and lines that end with hyphens.

Bullet points

- Use round bullets in a heavier weight whenever possible (i.e., lightweight text = bold bullet).

	LEADING (line spacing)	TRACKING (kerning)
Body copy	**1.1**	**0**
Subheads	**.90**	**0**
All-cap subheads	**.90**	**75**
Headlines	**.90**	**0**

07 Icons & graphic elements

Icons

Our icon system is functional yet friendly. Icons are used as accents to simplify complex, abstract ideas.

YES

- Use color combos shown. Single-color Slalom Blue or Slalom Dark Blue is preferred.
- Use one of 130+ approved icons from our Creative Library.
- If a new icon is needed, design it to match the style shown here, or find a similar style on a stock site.

NO

- Avoid overly detailed illustration.
- Avoid stock icons. Check the library first!
- Never “reverse colors” (i.e., put a light-colored icon on a dark background).

Primary single color

The preferred single-color version of the icon set is Slalom Blue and Slalom Dark Blue.

Secondary single colors

When a layout is already heavy in Slalom Blue or Slalom Dark Blue, our secondary colors can be used. Choose one color and use throughout a single layout.

Colored circle backgrounds

Our colored circle icons can be used on top of images or busy layouts. Slalom Blue and Slalom Dark Blue colored circles are not allowed.

ICONS & GRAPHIC ELEMENTS

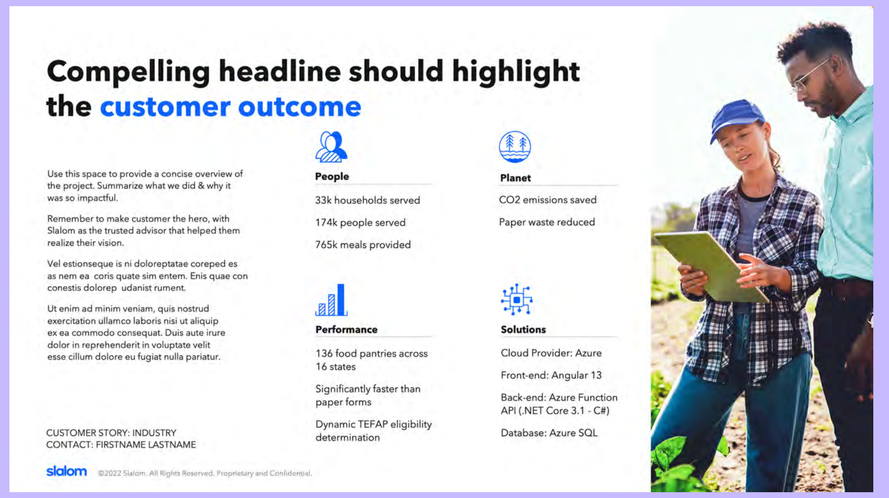

Icons and copy—better together

Our icon set is bold and concise, boiled down to the simplest visual expression yet maintaining our unique Slalom style. Icons work best when coupled with text that fully explains the idea.

Think conceptually when choosing an icon so that it adds deeper meaning, rather than redundancy.

Visit our Creative Library to download the full icon set, or view the latest PowerPoint template on the Brand Hub for a comprehensive list.

Icon + name

ICONS & GRAPHIC ELEMENTS

Graphic elements

Slalom has a variety of fresh and timeless design elements to help us break through in the consulting space.

Above all, our creative is fiercely human—warm, inviting, and approachable. We are anything but stodgy and interject joyfulness and innovation in everything we do.

Our design elements are intended to be versatile and have been created to fit virtually any design application from print collateral to social media, from pitch decks to websites, and more.

Access the latest design elements in our Creative Library.

Layouts are for reference only.

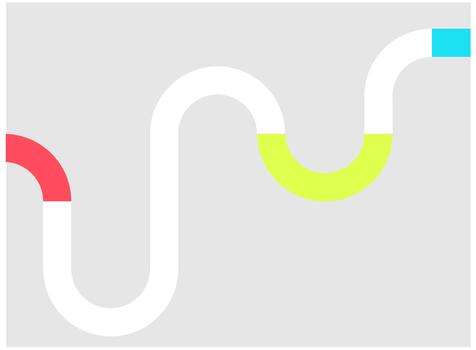

GRAPHIC ELEMENTS

Slalom lines: 3 types

These dynamic elements reference the fluidity of our logo and the origins of our name, implying navigation and flexibility.

We are precise and analytical, deeply rooted in technology, speed, and logic. Yet we are also empathetic, flexible, and human, guided by our hearts. This unique approach to our work is also represented by the pairing of straight and curved lines.

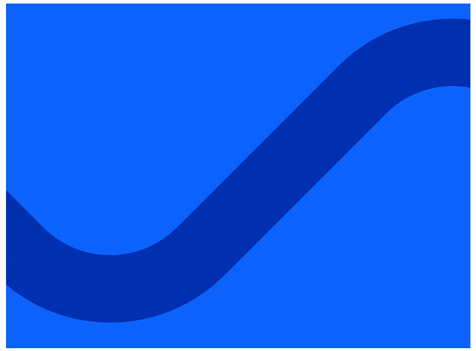

IMPORTANT
Modular paths should be built using the vector files from the Creative Library.

1. Modular path

A mixture of curved and straight lines is assembled in a variety of configurations to create unique background shapes.

Color should be limited to tone-on-tone combinations plus White, or a neutral background (White, Black, or Gray) with multiple colors from the primary or secondary palette. Multicolored lines should be separated by a generous amount of white to avoid striped or checkerboard effects.

2. Bold single line

Swooping lines mimic letterforms within the Slalom logo.

Color should be limited to tone-on-tone color combinations or a neutral color (White, Black, or Gray) with one accent color from the primary or secondary palette.

3. Macro "S" crop

Large geometric shapes (derived from the Slalom logo "S") are rotated, enlarged, and cropped to form graphic backgrounds.

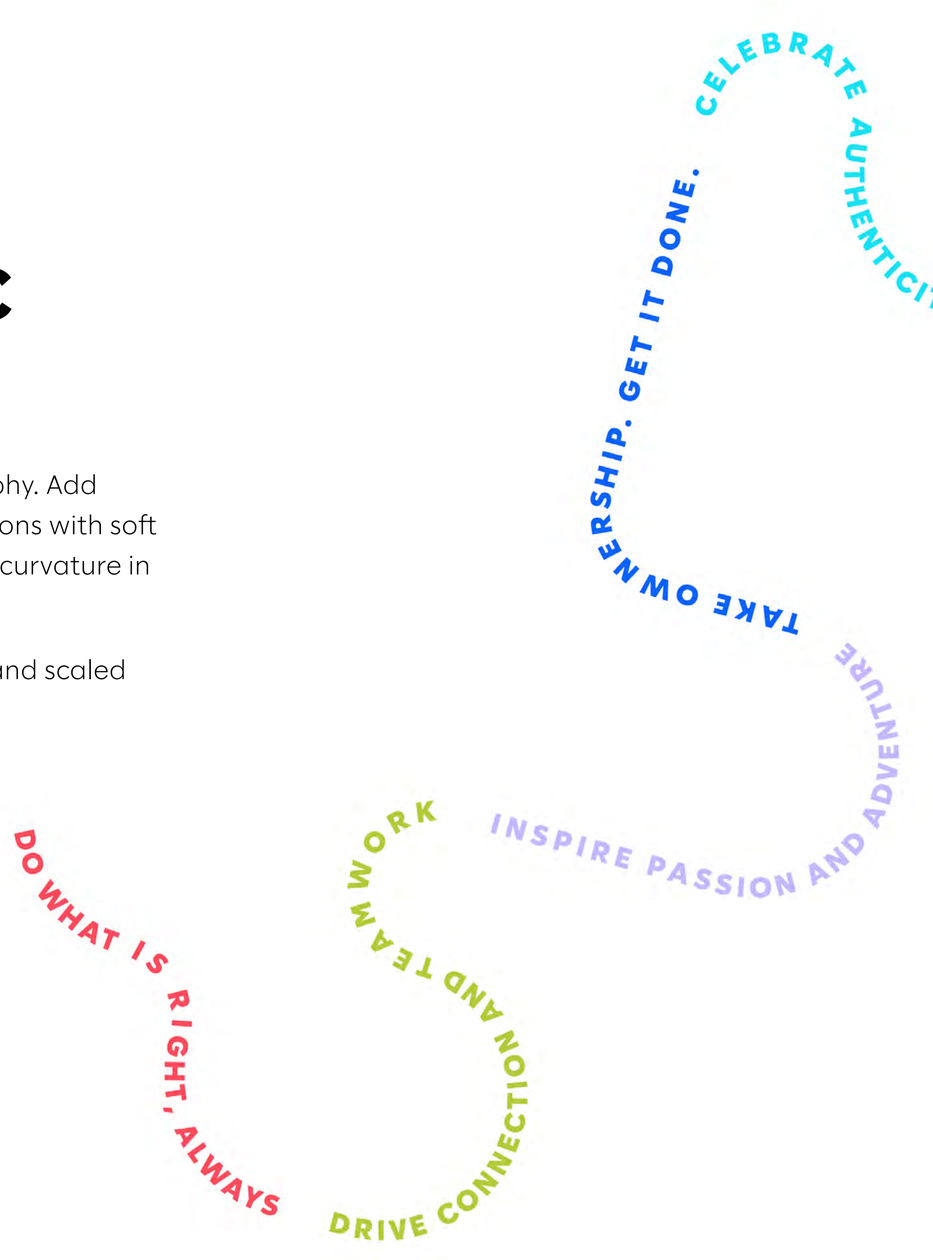

Color should be limited to tone-on-tone color combinations or a neutral color (White, Black, or Gray) with one accent color from the primary or secondary palette.

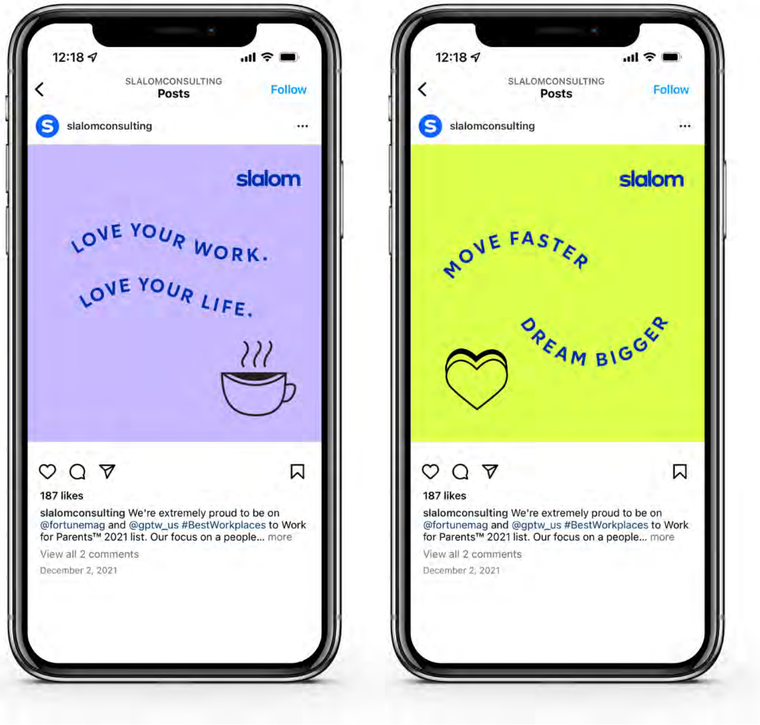

GRAPHIC ELEMENTS

Typographic Slalom lines

Our curving lines can be applied to typography. Add joyfulness and play to type-driven compositions with soft and swooping linework that is influenced by curvature in the logo.

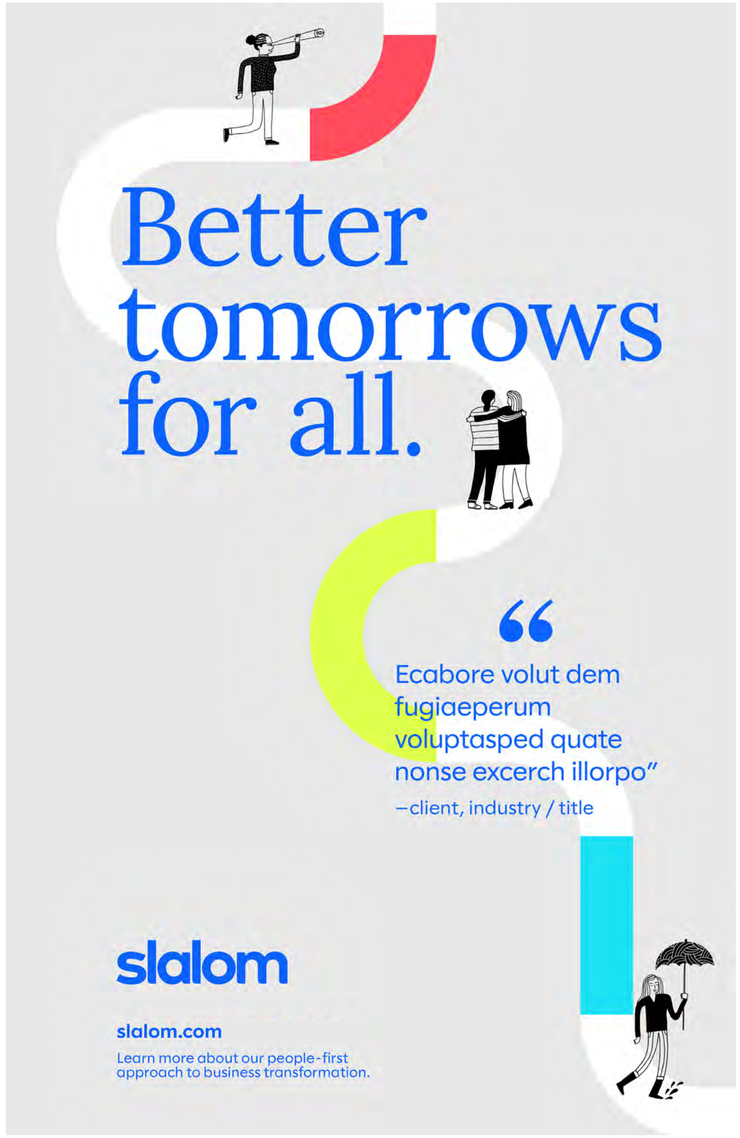

Take care to ensure type is properly kerned and scaled for legibility.

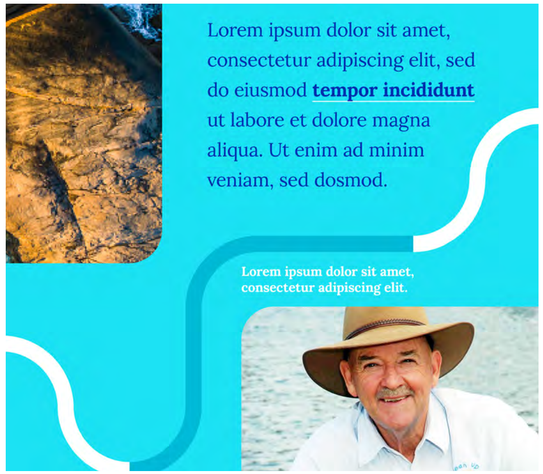

Layouts are for reference only.

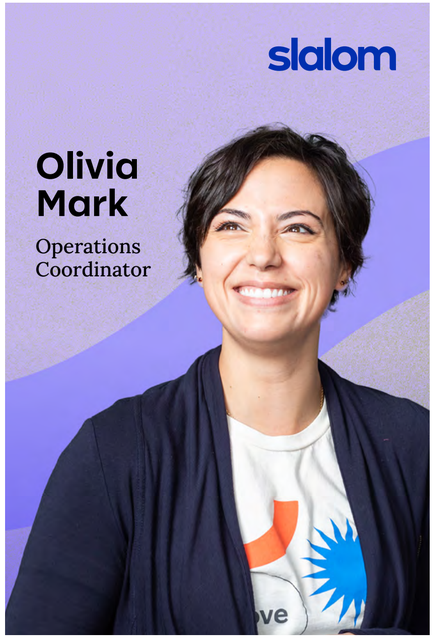

SLALOM LINES IN USE

Layouts are for reference only.

GRAPHIC ELEMENTS

Color bars

Color bars represent inclusivity, add vibrancy, and reinforce our brand palette.

IMPORTANT

1. Download the color bar EPS files from the Creative Library.

2. Colors MUST appear in this order: Slalom Blue, Cyan, Coral Red, Purple, Chartreuse.

YES

- **Colors:** If your layout's background color is the SAME color as one in the color bar, edit the color bar's color to the darkest version of that color. Example: "Purple" to "Dark 3 Purple." *See page 35 for approved colors.*
- **Framing:** The vertical Slalom Blue line should extend the height or width of the layout. *See Figure 1.*
- **Scaling:** Use the letter "I" (full or half width) in the Slalom logo to set color bar height.

NO

- Do not use multiple color bars in one layout.
- Do not re-create the color bars. Use files from the Creative Library.
- Don't scale your color bar more than 20% of the design layout.
- Don't change any color in the color bar unless it is the same as the background color.

Framing color bar

The solid blue line can go up either the right/left side or top/bottom of a layout. BOTH sides of the framing color bar should extend the FULL height or width of your layout. *See Figure 1 and Figure 3.*

Regular color bar

May be placed on any side of your layout.

Thin color bar for underlining text

Tall color bar

Figure 1

Figure 2

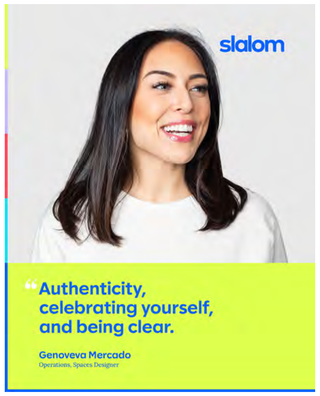

Figure 3

Layouts are for reference only.

GRAPHIC ELEMENTS

Object shapes and styles

Slalom shapes are a mixture of hard and soft angles representing creativity, flexibility, and precision. Our Creative Library has many downloadable files that can be used in your designs to create brand consistency.

YES

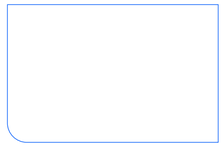

- Use shapes as frames as well as objects.
- Only use ONE rounded corner at a time.
- Be sure to match the curvature in the "l" of the Slalom logo. *See Figure 1.*

Rectangles

Represent precision and analytics. Used for more serious subjects, or can be juxtaposed next to a more playful image or portrait.

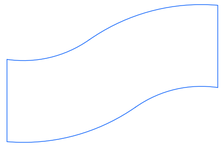

Single rounded corner

A single rounded edge on any of the four corners mimics the curvature of letterforms within the Slalom logo.

IMPORTANT A quick way to see if your curve matches is to scale up the "l" of the Slalom logo and match that curve.

Figure 1

Fluid waves

Friendly organic shapes reference the fluidity of our logo and the origins of our name, and imply navigation and flexibility.

08 Photography & video

PHOTOGRAPHY & VIDEO

Overview

Photography and video are powerful storytelling tools at Slalom. When used well, our imagery can reinforce a concept or warm up a slide. It can provide a moment of energy or a moment of quiet. It can help pace a presentation, personalize a document, or bring complex ideas to life.

Our Creative Lens: Is it fiercely human? *See page 17 for details.*

Our tone: Positive, optimistic, and joyful

Our scenes: Authentic, bright, and colorful

Our color: Vibrant and saturated, balanced by neutrals. Include pops of the Slalom brand palette when possible.

Our subject matter: Real people and places. High-quality. Low-pretension. Candid expressions, not overly posed or corporate. Culturally sensitive and location-based images, with an eye toward representing the countries we are in and where we will be.

Planning a shoot? Visit the Brand Hub to download our Video/Photo Shoot Guide.

PHOTOGRAPHY & VIDEO

How to find approved photos and video

The Slalom Creative Library

Global marketing has carefully curated and edited hundreds of photos and video clips for use in Slalom sales and marketing. Our collection includes both original photography and licensed stock photography of people, places, industries and capabilities, things, backgrounds, and more. You can find our regularly updated collection in our Creative Library.

Dos and don’ts

YES

Compose scenes that feel genuine and authentic. Candid, unposed, and realistic.

NO

Too “stock” or inauthentic.

YES

Capture authentic moments of hope. Keep tone positive and uplifting.

NO

Too focused only on the negative.

YES

Capture positive, optimistic, joyful, and hopeful scenes. Bright and cheerful colors.

NO

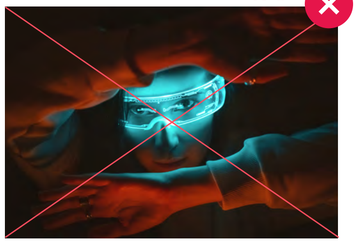

Too dark and dreary.

YES

Show realistic depictions of technology and human interaction.

NO

Too cyberpunk or distopian.

All photos for reference only.

Dos and don’ts

YES

Capture candid compositions with active subjects that are not aware of camera.

NO

Too posed for the camera.

YES

Be global-minded. Feature a wide range of locations, people, and cultures.

NO

Do not overindex on images from the US. Remember we are a global company.

YES

Be diverse and inclusive. Show distinct characteristics, lived experiences, and multiple cultural and physical identities. Choose unexpected and interesting photos that disprove stereotypes. **Don’t forget–representation matters.**

NO

When showing multiple photos, avoid homogeneity. For example, avoid selecting photos that only show one age range or one skin tone.

YES

Be real and relatable. Reflect the universal continuum of human experience.

NO

Too glamorized.

All photos for reference only.

Dos and don’ts

YES

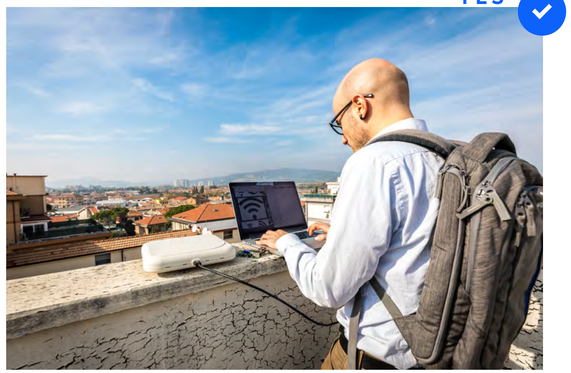

Celebrate authenticity and realism.

NO

Too posed. Seems staged.

YES

Be accurate. Depict believable scenarios based on geographic location.

NO

Don’t forget the geographic location of your image. For example, this photo wouldn’t work for a US audience since the electrical wall outlet doesn’t follow US standards.

All photos for reference only.

How to create images of people

The following pages are guidelines for our three styles of people images.

Style 1. Slalom employees

We showcase authentic moments of collaboration and teamwork—employees who love their lives and work. Imagery is approachable and human, and inspires optimism and joy.

Style 2. Global perspective

Our customers, our customers' customers, our partners, and our communities are shown in a culturally sensitive way, with an eye toward representation of the countries we are in and where we will be.

Style 3. Portraits

Portraits are captured in the moment to ensure expressions are authentic and not stiff or corporate.

Style 1. Slalom employees

USE CASES: employees, offices, events

YES

- **Show employee collaboration and Slalom's core values** in scenes that are authentic, bright, and colorful.
- Capture candid expressions and realistic interactions.
- Keep the tone positive, optimistic, and joyful.
- Use captions to highlight real employees when possible. *See "How to use image captions" on page 76.*
- Follow our Creative Lens. *See page 17.*

NO

- Do not be overly posed or corporate.
- Avoid cropping faces when possible.

Style 2. Global perspective

USE CASES: case studies, customers' customers

YES

- **Show personal connection at global scale.** Be real and reflective of the universal continuum of the human experience.
- Capture bright tomorrows in a documentary style that breaks through the competitive landscape with humanity and optimism.
- Show candid expressions and realistic interactions.
- Keep the tone positive, optimistic, and joyful. For serious or somber subjects, such as cancer research, seek out authentic moments of hope and optimism while maintaining a respectful lens.
- Follow our Creative Lens. *See page 17.*

NO

- **Don't forget your audience's culture and country.** Consider fashion selections and technology standards, such as wall outlets, etc.
- **Don't change colors in nonstock photos** that alter meaning (e.g., apron in bottom-left image should remain green due to coffee brand).

All photos for reference only.

Style 3. Portraits

USE CASES: headshots, featured employees and customers

YES

- **Celebrate the uniqueness of individuals and teams.**
- Add a slight warmth to flatter skin tones.
- Add captions whenever possible. *See page 76.*
- Add pops of brand color to clothing, accessories, and environmental props.
- Real and candid expressions, not overly posed.
- Be authentic and have fun.
- Follow our Creative Lens. *See page 17.*

NO

- Avoid corporate clichés.

How to create images of places

YES

- Include known landmarks for recognition.
- Highlight regional architecture or native vegetation.
- Showcase expansive areas (i.e., large skies, grassy fields, etc.).
- Include a touch of human presence whenever possible (i.e., person crossing a street or in cars on a bridge).
- Look for opportunities where brand colors are represented naturally in the scene (e.g., purple flowers, cyan sky/water, etc.).
- Choose daylight scenes whenever possible.

NO

- Avoid highly stylized night scenes.
- Do not use motion blur.
- Do not use camera effects (e.g., light leaks, lens flares, tilt shifts).

YES

Daylight scene that is colorful and features regional architecture and landmarks with expansive sky.

YES

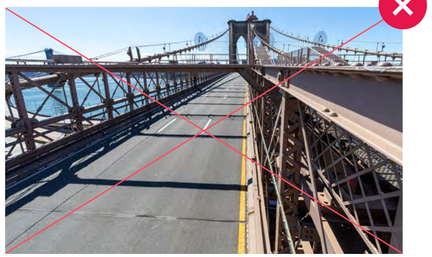

Naturally represented brand color with a touch of human presence in scene (e.g., car on bridge).

NO

Night scene is highly stylized with motion blurs and unnatural effects.

NO

Desolate scene with no human presence. Lacks color and vibrancy.

How to create images

of industries & capabilities

YES

- Reflect Slalom's core industries and capabilities.
- Highlight modern or future technology or tools. For instance, ensure wind turbines are accurate.
- **Include a touch of human presence** whenever possible.
- Scenes should feel expansive with areas of openness.
- **Find and enhance brand colors** in nature or architecture (e.g., purple flowers, cyan sky/water, etc.).

NO

- Avoid generic images.
- Avoid computer generated or overly futuristic.
- Avoid dark, moody, overly "techy" scenes.
- Do not use camera effects (e.g., light leaks, lens flares, tilt shifts).

YES

Daylight scene with expansive sky featuring human presence. Image represents a core industry at Slalom (i.e., utilities and energy).

YES

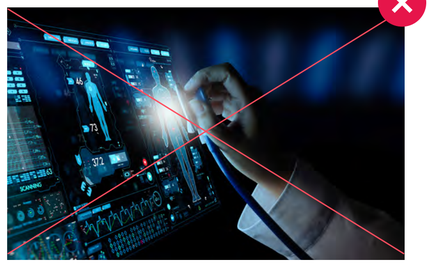

Positive and hopeful representation of human interaction. Image represents a core industry at Slalom (i.e., healthcare).

NO

Lacks vibrancy and color. No human presence.

NO

Too dark and moody with unnatural camera effects.

PHOTOGRAPHY & VIDEO

How to create images for backgrounds

YES

- Keep imagery simple so text and logos are legible.
- Showcase Slalom's industries, capabilities, core values, or market locations.
- Showcase a single brand color. You may recolor photos, but please avoid using a solid filter over the entire photo.
- Be optimistic and bright.
- Use soft and curving lines when possible.

NO

- Avoid detailed or complex imagery.
- Do not use images that feel computer generated, futuristic, or overly Photoshopped/filterized.
- Never dark, moody, overly "techy" scenes.
- No camera effects or obvious digital filters (e.g., light leaks, color filters, lens flares, tilt shifts).

Brand color: Chartreuse

YES

Bright and colorful scene that is simple and showcases our Slalom line in a natural setting.

Brand color: Slalom Blue

YES

Features a single brand color that occurs naturally in a simple composition. Image represents a core industry at Slalom (i.e., media and entertainment).

NO

Computer-generated and artificial effects added. Multicolored complex scene.

NO

Unnatural gradient color filter. Multicolored complex scene.

PHOTOGRAPHY & VIDEO

How to create conceptual images

Not every image needs to be literal. Sometimes a visual story is better told through creative symbolism and metaphor.

YES

- Be clever and artistic, not obtuse.
- Consider your audience's culture and background before choosing your symbolism.
- Surprise and delight the viewer.
- Be provocative without offending.

NO

- Avoid images that are cliché, overly used (e.g., hand gestures forming heart shape), or too abstract.
- Never use images that may offend or confuse.
- No camera effects or obvious digital filters (e.g., light leaks, color filters, lens flares, tilt shifts).

PHOTOGRAPHY & VIDEO

How to create image stories

From case studies to social media carousels, imagery that tells a story engages and inspires audiences.

YES

- Show images in a logical narrative sequence.
- Choose a visually arresting opening image for your first visual to draw the viewer in.
- Vary your shots. Include wide establishing shots, medium shots, and close-ups.
- Add captions to give context.
- **If using stock imagery, choose similar artistic style, lighting, color grade, and focal range.**

NO

- Avoid unnecessary repetition or monotony.

All photos for reference only.

IMAGES OF PEOPLE

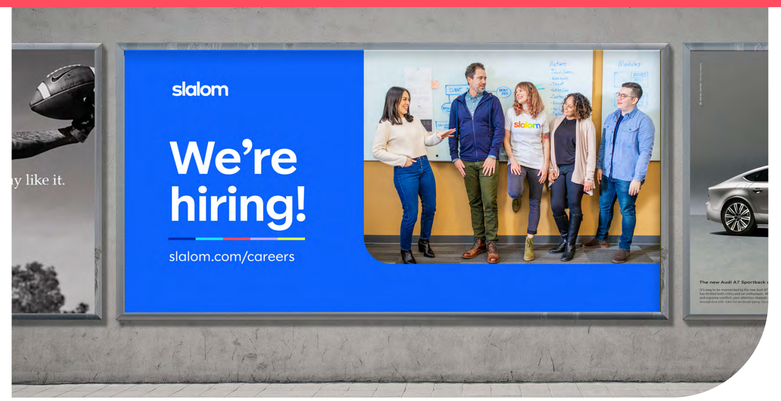

How to use image captions

YES

- When possible, add captions when representing a genuine Slalom employee, team, event, or office.
- Captions can include a name and title or full descriptive sentences.

NO

- Do not use a caption if an image is already paired with headline copy that showcases the name or title.
- It is unnecessary to use a caption if the Slalom logo is visible in the photo, unless individuals or teams need to be highlighted. *See example top left.*

How to add brand colors

YES

- **Adjust colors to match brand palette** for brand recognition and differentiation (e.g., convert a yellow shirt to Chartreuse).
- **Add pops of brand colors** through wardrobe, accessories, and props.
- Enhance colors for overall vibrancy, saturation, and tonality.

NO

- **Never radically alter colors in documentary-style photography**, such as case studies. For example, do not change a black shirt to red.

BEFORE-Mugs in nonbrand colors.

BEFORE—Woman's shirt in gray.

PHOTOGRAPHY

How to color-correct images

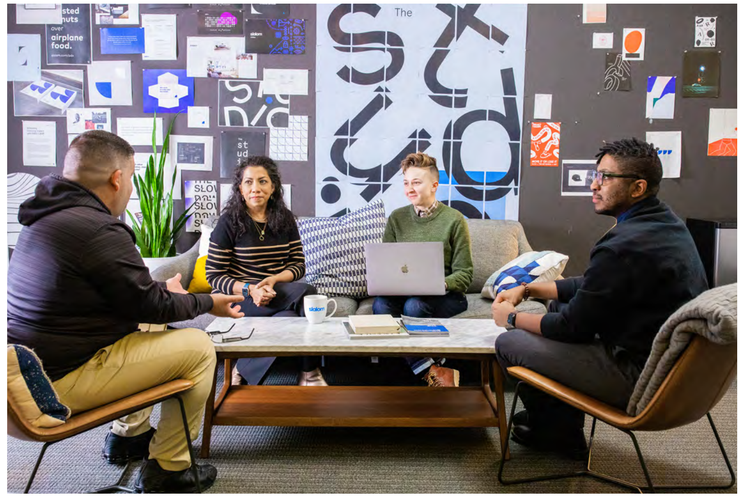

YES

- **Use our "True Color" preset** as a launching point for color correction (additional adjustments will likely be required). This is an easy way to gain visual consistency and efficiency. This preset will enhance color saturation, clarity, and brightness to better align with our brand standards.
- **Not sure how to use a color preset?** Visit our Creative Library for preset files.

BEFORE & AFTERS

AFTER—Color preset used

BEFORE

BEFORE

How to use stock imagery

YES

- **Use stock photos and video ONLY when a custom shoot is not feasible**. Stock is often used to symbolically represent our customer and our customer's customer when we don't have the ability to shoot real subjects.

- Visit our Creative Library to download approved color-corrected stock images.

NO

- **Never use stock to depict Slalom employees.** Photos of employees MUST be of real employees, have a signed release form,* and be captioned when appropriate. *See "How to use image captions" on page 76.*

STOCK PHOTOGRAPHY

NONSTOCK PHOTOGRAPHY

*If an employee has signed a release form, Slalom may continue to use their likeness as long as they have left amicably and are not employed by a competitor at a senior level.

09 Illustration

ILLUSTRATION

Overview

Use of illustration differentiates the Slalom brand and helps bring to life our industries, services, core values, and market locations in a unique, fiercely human way. From different skin tones to body shapes, ages, genders—everyone can see themselves in Slalom's illustrations.

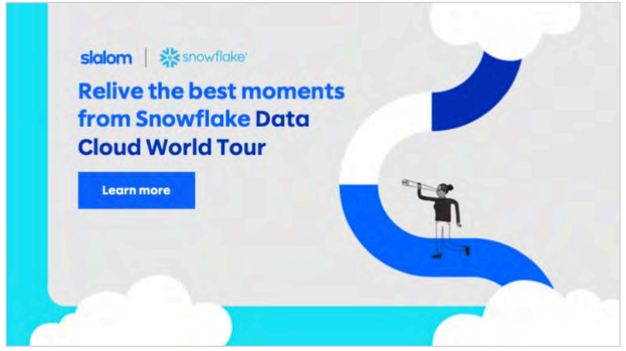

YES

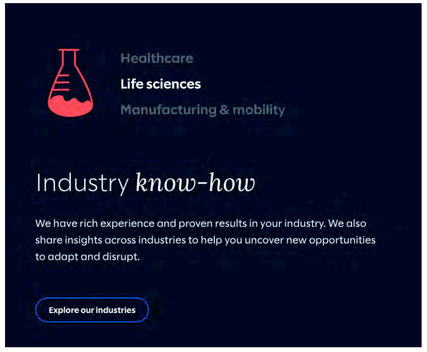

- There are many approved illustration in our Creative Library in Slalom branded materials.
- Showcase a diverse assortment of people.
- Consider using illustration as an accent, rather than a primary subject.

NO

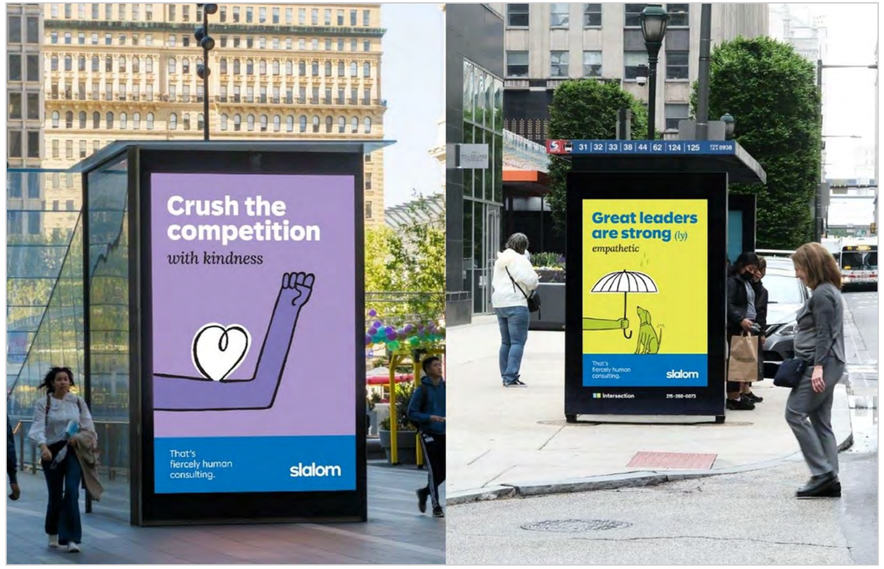

- **Avoid overusing illustration.** The Slalom brand is primarily photo-first, but on occassion we do lean into illustration. If you're considering using a lot of illustration in your project, please connect first with the Global Marketing Studio.

EXAMPLES

How to use SVG illustration files

Scalable Vector Graphics (SVG) is a vector image format. As opposed to pixel-based raster files like JPEGs, **a SVG vector file can be scaled to any size, be recolored, and retain its transparent areas** when used in HTML and when placed in programs such as PowerPoint and Adobe CS.

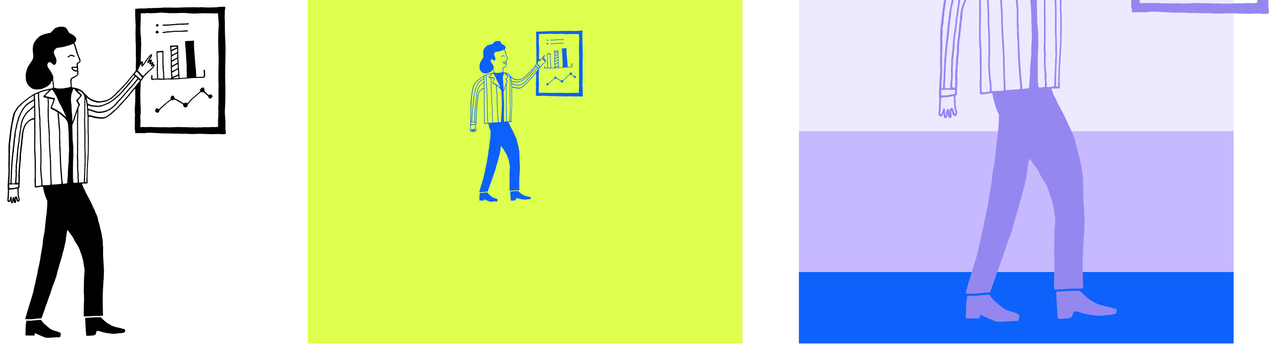

Figure 1: Each of these three illustrations of the woman is using the SAME SVG file. They have just been copied, pasted, and recolored in this layout program.

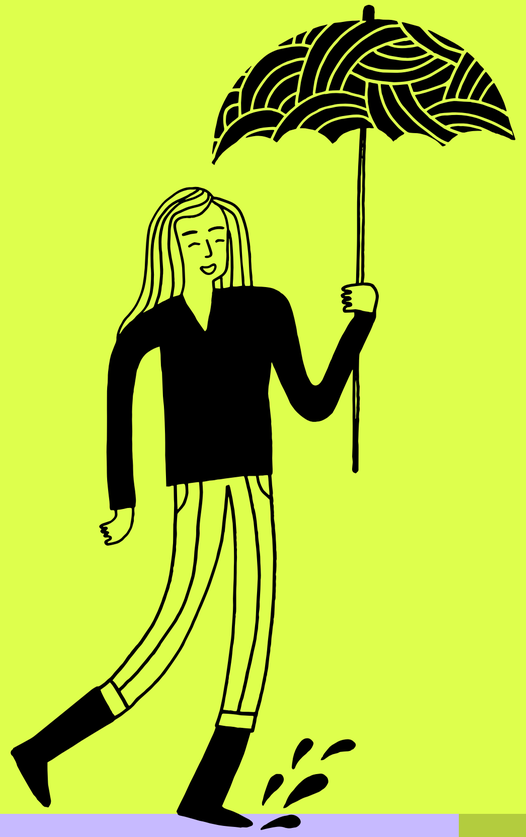

INSTRUCTIONS

1. To recolor illustrations and icons, place or import the SVG image *(see Figure 1)* in your document.
2. Use the direct selection tool (arrow) to select the image.
3. With image selected (highlighted) in document, open your swatch palette and select any of our brand colors to recolor.

Exception: Adobe InDesign

To recolor illustrations and icons in InDesign, FIRST open the SVG file in Illustrator, then copy and paste into InDesign.

10 Gear

GEAR

Overview

Slalom gear is external facing and represents a huge opportunity to showcase our brand to new and existing customers, partners, and potential recruits.

Gear should be made to last, aligned to our brand guidelines, and designed to make people proud to wear or use it over time.

Gear inspiration

Using the Slalom logo

The Slalom logo should be present on all merchandise and ONLY in Slalom Blue, Slalom Dark Blue, Black, White, or Gray. This not only reinforces the brand but also allows items to be multipurpose and timeless.

Acceptable color combinations
Note: Partner with the gear team to select a product that closely matches our palette. *See page 34 for PMS colors.*

Slalom sub-brand logo lockups

When using an approved Slalom logo lockup with a team, location, or industry, the stacked option is preferred. For partner logos, the horizontal lockup is preferred and also acceptable as an alternative for certain items. *See guidelines for creating an approved Slalom logo lockup on page 29.*

Creative library

We have a wealth of design resources in our Creative Library that can be leveraged to create custom gear items. Using these existing elements ensures your item will be on-brand.

Illustrations: Approved colors are black, Slalom Blue, and Slalom Dark Blue. A range of halftone skin patterns are offered. Use when product allows.

Icons: Single-color approved icons are black, Slalom Blue, and Slalom Dark Blue. Icons with a colored circle must be Slalom Dark Blue. Circle can be any secondary color.

Design elements: Utilize design elements (color bar, Slalom lines, etc.) to create custom yet on-brand designs.

Slalom "S": The stand-alone "S" can be used as a graphic element in any brand color, but the Slalom logo must be present in the design.

Color

To maintain brand equity, Slalom Blue or Slalom Dark Blue must be visible on items.
When budgets are tight or material does not allow for multiple colors, Slalom Blue or Slalom Dark Blue must be prioritized.

Color: Only use approved color combos. *See page 36.*

Fonts

Slalom Sans Bold or Lora Medium
Use the Slalom Sans typeface only, unless using an approved "fiercely human" or "fiercely human consulting" text lockup from our Creative Library.
Case: Sentence case usually preferred.
Color: Text color combos must pass accessibility rules. *See page 44.*

Recommended phrases

You can find EPS files of these text lockups in our Creative Library.

Special order artwork

REMEMBER: Custom artwork requests of over 500+ items must be designed or reviewed by Global Marketing.

When special events and team needs arise and Global Marketing is not able to provide custom design support, adhere to the following guidelines.

YES

- **All artwork should use design assets and illustrations from our Creative Library.**
- The Slalom logo must be placed separate and away from the artwork OR placed on the sleeve or back of shirt.
- Use approved brand colors, including dark tones and tints. Work with gear to find apparel and items colors in our brand palette.
- Event or team names should be typed in Slalom Sans regular or bold. *See sub-branding on page 29 for more logo detail.*

NO

- **Do not create net new illustrations, icons, or logos.**
- Do not incorporate the Slalom logo into your artwork. The logo must be 30% away from the artwork, OR place Slalom logo on the sleeve or back of shirt.
- Do not use the word "Slalom" in your artwork. For example, "Slalom (Softball Team Name)."
- Don't introduce new fonts. Slalom Sans and Lora are our fonts.
- Don't design logos.
- Don't add event dates. Your item should be timeless.
